INTERNSHIP REPORT PRESENTATION

Web Development

Internship at BotrixAI

Live Web Development Internship | Botrix Technologies (BotrixAI)

Sutej Bir Rana

Roll No. 25SCS1003004385 | B.Tech CSE

June – July 2026

Sutej Bir Rana

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

25SCS1003004385

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE (Core), Batch 2025–2028

Internship Domain

Web Development

Duration

6 Weeks | June – July 2026

Botrix Technologies (BotrixAI)

Botrix Technologies, operating under the brand BotrixAI, is a software and AI company headquartered in Raipur, Chhattisgarh. The organization builds AI-driven automation and customer-engagement products — including chatbots and business-automation tools — and also delivers web development services to clients. As part of its internship program, Botrix Technologies gives interns hands-on, live-project experience working directly with its technical team.

Software & AI Company

Builds AI automation and customer-engagement products for businesses.

Based in Raipur, Chhattisgarh

Headquartered at Barsana Enclave, Tatibandh, Raipur.

Live Client Projects

Interns work directly on real, client-facing web development work.

PROBLEM STATEMENT

From Static Business Info to a Live Website

Small, local businesses such as cafes often lack a professional online presence, making it hard for customers to find their menu, ambiance, and location before visiting. Building a complete website traditionally means heavy front-end coding plus a separately managed backend. This internship addressed that gap by using an AI-assisted development environment together with a managed cloud backend to design, build, and ship a live business website end-to-end.

This internship addressed that gap — practically learning the full build-to-deploy workflow:

What the Internship Set Out to Achieve

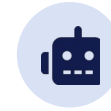

Responsive Website

Design and build a clean, mobile-friendly website for a real coffee shop client.

Menu & Location Showcase

Present the shop's branding, full menu, and location clearly to visitors.

AI-Assisted Development

Use Google AI Studio to rapidly generate and refine the site's front-end.

Backend Integration

Integrate Firebase to store and serve the website's content.

Live Deployment

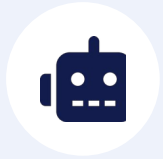

Deploy and host the finished site on Vercel for public access.

Client Collaboration

Work directly with the Botrix Technologies team on a live project.

The Toolkit Behind the Internship

Google AI Studio

AI-assisted development

HTML, CSS, JS

Core web technologies

Firebase

Backend & data storage

Firestore

Content for menu & shop info

Vercel

Hosting & deployment

Responsive Design

Mobile-friendly layout

Version Control

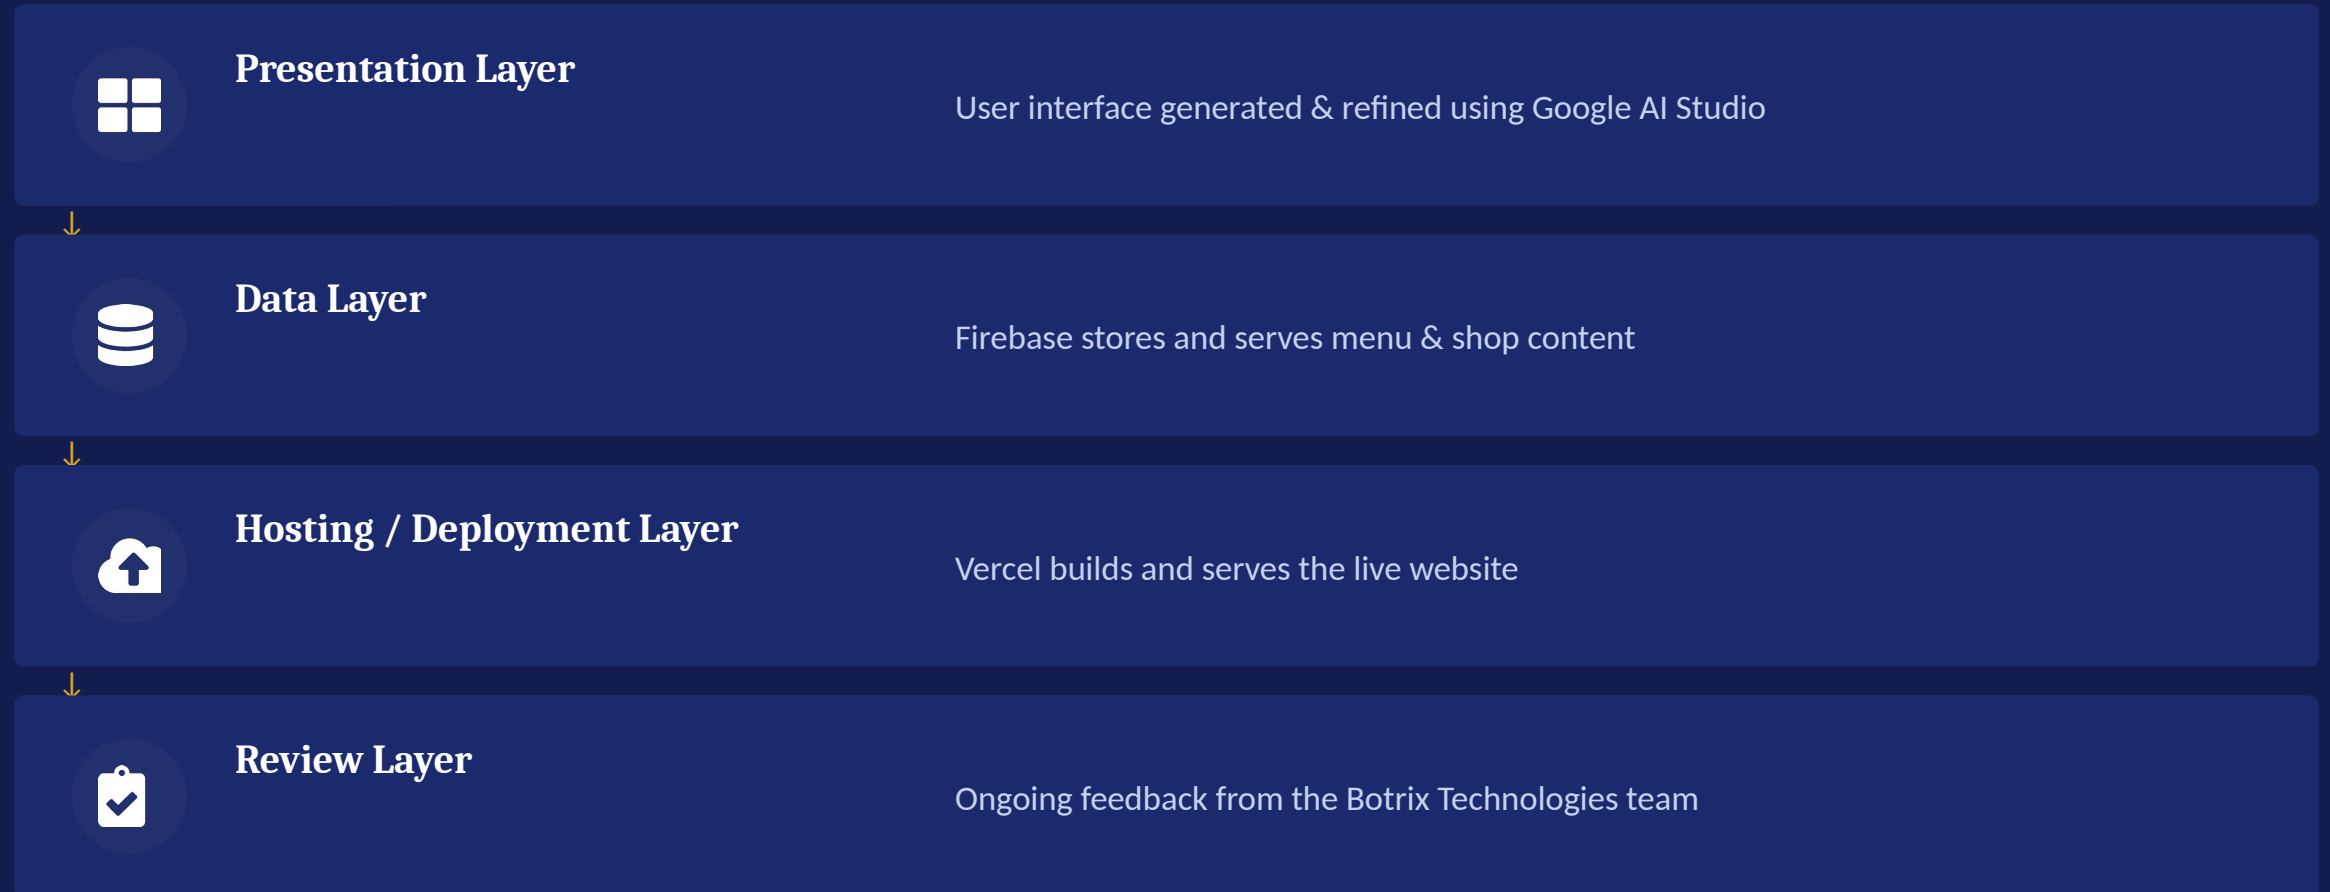

Tracking project changes

Live Deployment

Continuous publishing

From Design to Live Website

The 6-Week Internship Journey

1 WEEK

Onboarding & Requirements

Understood the coffee shop client's branding, menu, and content needs.

2 WEEK

UI/UX Design & Wireframing

Planned the website layout for home, menu, and location sections.

3 WEEK

Front-End Development

Built the website's front-end using Google AI Studio.

4 WEEK

Backend Integration

Integrated Firebase to store and serve website content.

5 WEEK

Testing & Responsive Design

Tested across devices and refined layout and styling.

6 WEEK

Deployment & Final Review

Deployed on Vercel and reviewed with the Botrix Technologies team.

EXPECTED OUTCOMES

Skills & Capabilities Gained

- ✓ Ability to design and build a responsive, business-facing website from requirements to deployment
- ✓ Practical experience using an AI-assisted development environment (Google AI Studio) to speed up front-end development
- ✓ Hands-on exposure to integrating Firebase as a backend service for a live website
- ✓ Skill to deploy and host a website using Vercel
- ✓ Experience collaborating on a live, client-facing project with a professional team
- ✓ A completed, publicly deployed website — “The Midnight Brew” — and an Internship Experience Letter confirming successful completion
