

An Internship Report
Of
Web Development Internship at BotrixAI

Submitted
To
School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

By

Roll Number of Student: 25SCS1003004385
Name of Student: SUTEJ BIR RANA
Batch: 2025-2028

CANDIDATE'S DECLARATION

I, SUTEJ BIR RANA, do hereby declare that the internship report titled “Web Development Internship at BotrixAI” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Student Name: SUTEJ BIR RANA

Roll No.: 25SCS1003004385

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank Botrix Technologies (BotrixAI) for providing me the opportunity and a structured platform to learn and gain hands-on exposure in the domain of Web Development. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

TO WHOMSOEVER IT MAY CONCERN

This is to certify that Sutej Bir Rana successfully completed an internship at BotrixAI as a Web Development Intern, from June 01, 2026 to June 12, 2026, spanning a duration of 6 weeks.

During this period, Sutej demonstrated strong technical skills, a proactive attitude, and a commitment to learning. Sutej worked on real-time projects and contributed meaningfully to the responsibilities assigned as part of the Web Development Intern role.

We found Sutej to be sincere, hardworking, and a quick learner throughout the internship tenure. We wish Sutej the very best in all future endeavors.

Warm regards,

HR Manager

WELCOME LETTER FOR INTERNSHIP

Dear Sutej Bir Rana,

We are pleased to welcome you to BotrixAI as a Web Development Intern. We were impressed with your skills and enthusiasm during the selection process, and we are confident that you will be a valuable addition to our team.

Your internship will commence on June 01, 2026 and conclude on July 12, 2026, for a total duration of 6 weeks. During this period, you will work closely with your team, contribute to live projects, and gain hands-on experience in your area of specialization.

Please treat this internship as an opportunity to learn, collaborate, and grow. Should you have any questions before your start date, feel free to reach out to us at any time.

Once again, welcome to BotrixAI. We look forward to working with you.

Warm regards,

HR Manager
Botrix Technologies

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the 6-week internship undertaken at Botrix Technologies (BotrixAI), Raipur, in the role of Web Development Intern. The internship was carried out from June 01, 2026 to July 12, 2026 as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida. The primary aim of this internship was to build a strong practical foundation in front-end and full-stack web development, and to apply it to a real-world project: “The Midnight Brew”, a website built for a coffee shop.

The internship followed a structured, project-based approach combining conceptual learning with hands-on development, culminating in the design, development, and deployment of a live, publicly accessible website. On successful completion of all the assigned responsibilities, an Internship Experience Letter was issued by Botrix Technologies, confirming successful completion of the internship.

4.2 Organization Profile

Botrix Technologies, operating under the brand BotrixAI, is a software and AI company headquartered at D-203, Barsana Enclave, Tatibandh, Raipur, Chhattisgarh. The organization works in the domain of AI-driven automation and web-based customer engagement solutions, including chatbots, business automation tools, and web development services. As part of its internship program, Botrix Technologies provides students with hands-on, live-project experience, allowing interns to work closely with the technical team and contribute to real client-facing deliverables.

4.3 Problem Statement

Small and local businesses such as cafes and coffee shops often lack a professional, accessible online presence, making it difficult for potential customers to discover their menu, ambiance, and location before visiting. At the same time, building a fully functional website traditionally requires substantial front-end coding effort and a separately managed backend for storing and serving business data. The problem addressed during this internship was to design and develop a complete, responsive coffee-shop website - “The Midnight Brew” - that presents shop details, menu, and location information clearly, while using modern AI-assisted development tools and a cloud backend to speed up and simplify the build-and-deploy workflow.

4.4 Project Objectives

- To understand the end-to-end workflow of designing, developing, and deploying a modern website.
- To use Google AI Studio as an AI-assisted development environment for rapidly generating and refining the website's front-end.
- To design a clean, responsive user interface presenting the coffee shop's branding, menu, and ambiance.
- To integrate Firebase as a backend service for managing and serving the website's data.
- To deploy and host the completed website on Vercel for public access.
- To ensure the website is responsive and functions correctly across desktop and mobile devices.
- To gain practical, live-project experience in a professional web-development environment.

4.5 Scope of the Project

The scope of this internship covers the complete workflow of building a business-facing website - from requirement understanding and UI design, through AI-assisted front-end development, to backend integration and public deployment. The project, “The Midnight Brew”, focuses on presenting a coffee shop's identity, menu, and location to visitors through a single, responsive website. The work was carried out as a live project under the guidance of the Botrix Technologies team and was limited to the design, development, and deployment of the website; it did not extend to functions such as online payment processing or order management.

4.6 Technologies and Tools Used

- Development Environment: Google AI Studio, used for AI-assisted generation and iteration of the website's front-end.
- Core Web Technologies: HTML, CSS, and JavaScript-based front-end structure.
- Backend/Database: Firebase, used to store and serve application data for the website.
- Hosting & Deployment: Vercel, used to deploy and host the live website.
- Version Control & Collaboration: Standard web-development workflow tools used during the internship at Botrix Technologies.

4.7 System Architecture

The general architecture followed for “The Midnight Brew” website can be summarized in the following layers:

- **Presentation Layer:** The website's user interface, generated and refined using Google AI Studio, presenting the coffee shop's branding, menu, and location details.
- **Data Layer:** Firebase, used as the backend service to store and serve content displayed on the website.
- **Hosting/Deployment Layer:** Vercel, which builds and serves the live website to end users at themidnightbrew.vercel.app.
- **Assessment Layer:** Ongoing review and feedback from the Botrix Technologies team during the internship, culminating in the final Internship Experience Letter.

4.8 Methodology

The internship followed a structured, week-wise methodology combining onboarding, design, development, and deployment, as summarized in the table below.

Week	Task	Description
1	Onboarding & Requirement Gathering	Introduction to the Botrix Technologies team and workflow; understanding the coffee shop client's requirements for branding, menu, and content.
2	UI/UX Design & Wireframing	Planning the website layout and visual design for “The Midnight Brew”, including sections for home, menu, and location.
3	Front-End Development	Building the website's front-end using Google AI Studio as an AI-assisted development environment.
4	Backend Integration	Integrating Firebase to store and serve website content such as menu and shop details.
5	Testing & Responsive Design	Testing the website across devices and screen sizes, and refining layout, styling, and content.
6	Deployment & Final Review	Deploying the completed website on Vercel and conducting a final review with the Botrix Technologies team.

Note: There was no stipend associated with this internship.

Each week concluded with an informal review with the Botrix Technologies team to track progress. On completion of all assigned work, an Internship Experience Letter was issued, confirming successful completion of the 6-week internship.

4.9 Expected Outcomes

- Ability to design and build a responsive, business-facing website from requirements to deployment.
- Practical understanding of using an AI-assisted development environment (Google AI Studio) to accelerate front-end development.
- Hands-on exposure to integrating Firebase as a backend service for a live website.
- Skill to deploy and host a website using Vercel.
- A completed, publicly deployed website - “The Midnight Brew” - along with an Internship Experience Letter confirming successful completion of the internship.

4.10 Certificates of Completion and Communication Proof

The Internship Welcome Letter and the Internship Experience Letter issued by Botrix Technologies, confirming successful completion of the 6-week Web Development Internship, are attached in Chapter 3 of this report.
